# Designing a Console Control

Carlos Saloio
WEB DEVELOPER

csaloio1@yahoo.com   www.codedark.xyz

Steps to Create a Web Control

Design the HTML markup

Style the HTML using CSS
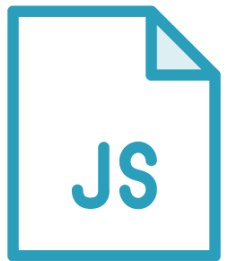

Add functionality using JavaScript

Creating the HTML

Styling the Console

# Creating a Control with JavaScript

Monospace Font

A font in which each character occupies the same amount of horizontal space.

Security Checks

Client-Side

Only to provide a better user experience.

Server-Side

The only place security checks can be trusted to be enforced.

Summary

Designed console HTML

Styled console using CSS

Wrote initialization code

Learned client-side security is unsafe
